

Condo Corridor Lighting Planner

Deomax - GTA Commercial Renovation Guide 2026

Set the Fundamentals

1 Choose one colour temperature

Warm 2700 to 3000K, consistent on every floor.

2 Design in three layers

Ambient, accent, and wayfinding light together.

3 Control glare

Recessed or diffused fixtures, no bare sources at eye level.

4 Add smart controls

LED with occupancy-aware dimming to cut energy.

Zone by Zone and Safety

1 Main corridor

Even recessed or linear LED, evenly spaced.

2 Doors and lobby

Soft accents at doors, a feature moment at the lobby.

3 Wayfinding

Crisp light on suite numbers, directions, and exits.

4 Keep the safety layer

Rated emergency and exit lighting, ESA inspected.
