

Dental Fit-Out Systems Checklist

Deomax - GTA Commercial Renovation Guide 2026

Lock In Before Demolition

1 Final operatory layout

Chair positions set before the slab is cut for drains and suction.

2 Electrical load calculation

Confirm whether the panel and service need upsizing.

3 Mechanical room sizing

Space the vacuum pump and compressor for clearance and cooling.

4 Data and imaging cabling

Plan structured runs to every chair during rough-in.

Compliance and Inspections

1 Amalgam separator

Required on the suction waste side in Ontario.

2 Backflow prevention

Certified, tested device protects the potable supply.

3 Electrical inspection

Work done by a licensed contractor and reviewed by the ESA.

4 Infection control layout

Sterilization and hand hygiene meet RCDSO standards.
